Education

University of Waterloo **September 2025 – May 2030 (expected graduation)**
Honours Computer Engineering, Co-op *Waterloo, ON*

Skill Set

Programming: Python, JavaScript (ES6+), C/C++, SQL, HTML5, CSS3

APIs & Development: REST APIs, GraphQL, OData, HTTP, JSON, XML, DOM Manipulation, Data Validation

Tools & Platforms: Git/GitHub, Microsoft Power Automate, Dynamic 365 Business Central, Shopify Admin API, DispatchTrack

Engineering Practices: Data Structures & Algorithms, OOP, Debugging, Functional Testing, Agile/Scrum

Relevant Experience

Tech Support Specialist Co-op **September 2026 – December 2026**
Canadian Spa Company *Oakville, Canada*

- Developed 14 Microsoft Power Automate workflows, including **6+ deployed to live-production, within my first month**, integrating Dynamics 365 Business Central, Shopify, DispatchTrack, Microsoft Teams, and SharePoint to automate order processing, fulfillment, logistics, approvals, and reporting.
- Built **cross-system integrations** using **REST/OData APIs, GraphQL, HTTP, and JSON** to retrieve, transform, validate, and reconcile data across ERP, e-commerce, and logistics platforms; implemented data mapping, conditional logic, and duplicate-processing safeguards.
- Developed 5 live daily warehouse reporting **workflows covering 9 locations across 4 operational regions**, automating overdue detection and location-specific notifications; reported overdue records fell from **25 to 4 in one day and 2 by day three (92% reduction in 3 days)** following implementation.
- Automated **order processing, fulfillment, logistics, customer notifications, and invoice reconciliation**, reducing reliance on manual checks and follow-ups; standardized operational communications through reusable HTML/CSS email templates and technical documentation.

Web & UX Intern | Waterloo Experience Accelerate Program **January 2026 – April 2026**
Grassroots Response To The Ukrainian Crisis *Waterloo, Canada*

- Executed manual QA test scenarios across multiple deployment environments to identify critical bugs and assess UI/UX quality for a live web application serving **1,000+ monthly active users**.
- Implemented website layout redesigns and content updates using the **Wix Content Management System (CMS)** to address usability issues and improve interface consistency without hard-coded changes.
- Authored **technical defect reports, console-log summaries, and internal documentation** while collaborating in Agile sprint planning, backlog grooming, and cross-functional stand-ups to communicate issues and support engineering prioritization.

Projects

Expense Tracker | *Vanilla JavaScript, Core State Routing, localStorage* |
- Developed a **responsive financial application** with transaction management, real-time income/expense calculations, dynamic balance updates, and persistent browser storage.
- Debugged floating-point calculation errors and tested numerical **edge cases**; implemented defensive **JSON parsing and exception handling** to prevent crashes from malformed stored data.

JS Quiz Engine | *JavaScript (ES6+), DOM Manipulation, Web Storage API* |
- Developed an interactive quiz application featuring randomized questions and answer choices, real-time scoring, progress tracking, and immediate answer validation.
- Implemented event-driven state management, performance-based feedback, and persistent high-score tracking using localStorage; designed responsive interfaces with CSS Grid and Flexbox.

Certifications

Python Programming (LinkedIn Learning, 2026) | **SQL Essential Training** (LinkedIn Learning, 2026) | **Front-End Web & UX Design** (LinkedIn Learning, 2025)
