Education

University of Waterloo **September 2025 – May 2030 (expected graduation)**
Honours Computer Engineering, Co-op *Waterloo, ON*

Skill Set

Programming Languages: Python, C, C++, JavaScript (ES6+), TypeScript, SQL

Web & Software Development: React, Node.js, HTML/CSS, Object-Oriented Programming (OOP)

APIs & Data: REST APIs, GraphQL, OData, HTTP, JSON, XML, API Integration, Data Mapping

Tools & Platforms: Git/GitHub, Linux, Bash/Shell, Microsoft Power Automate, Dynamics 365 Business Central, Shopify Admin API, DispatchTrack, Microsoft 365, Figma

Engineering Practices: Data Structures & Algorithms, Software Development Life Cycle (SDLC), Agile/Scrum Copy skills section

Relevant Experience

Tech Support Specialist Co-op **September 2026 – December 2026**
Canadian Spa Company *Oakville, Canada*

- Developed **5+ Microsoft Power Automate workflows within the first month of my co-op**, with several deployed to production, integrating **Dynamics 365 Business Central, Shopify, DispatchTrack, Microsoft Teams, and SharePoint** to automate order processing, fulfillment, logistics, approvals, and reporting.
- Built cross-system integrations using **REST/OData APIs, GraphQL, HTTP, and JSON** to retrieve, transform, and reconcile data across ERP, e-commerce, and logistics platforms; implemented data mapping, validation, and duplicate-processing safeguards.
- Automated operational reporting and exception notifications, including multiple live overdue warehouse activity workflows report covering **9 locations across 4 broader operational regions.** Reduced reliance on manual record checks and email follow-ups, and developed reusable HTML/CSS email templates and dynamic reporting tables.

Web & UX Intern | Waterloo Experience Accelerate Program **January 2026 – April 2026**
Grassroots Response To The Ukrainian Crisis *Waterloo, Canada*

- Executed manual QA test scenarios across multiple deployment environments to identify critical bugs and assess UI/UX quality for a live web application serving **1,000+ monthly active users**.
- Implemented website layout redesigns and content updates using the **Wix Content Management System (CMS)** to address usability issues and improve interface consistency without hard-coded changes.
- Authored **technical defect reports, console-log summaries, and internal documentation** while collaborating in Agile sprint planning, backlog grooming, and cross-functional stand-ups to communicate issues and support engineering prioritization.

Projects

Expense Tracker | *Vanilla JavaScript, Core State Routing, UI Engineering* |

- Built a JavaScript expense tracker from scratch (no frameworks) to practice core logic, state handling, and DOM manipulation.
- Implemented a **profit-percentage calculator** that updates in real time as transactions are added.
- Found and fixed floating-point rounding bugs, **testing across 8+ edge cases** to keep totals accurate.
- Added error handling (try/catch) around JSON parsing so the app doesn't crash on bad or missing saved data.
- Used **GitHub Copilot** to speed up iteration, with all changes tracked in Git.

Certifications

Governance & Cloud Infrastructure: Microsoft Security Essentials Professional; Microsoft Certified: Azure Fundamentals Cloud Concepts (AZ-900); AWS Certified Cloud Practitioner (In Progress)

Core Engineering & Data: Data Structures & Algorithms; Python Essential Training; SQL Essential Training
